DETAILED ACTION

1. The preliminary amendment filed 1/21/04 has been entered. Claims 1-20 have been cancelled. The newly added claims 21-46 are pending in this Office action.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21-46 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No.

Art Unit: 2637

6,704,352. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 21-46 of the instant application merely broadens the scope of the claims 1-20 of the U.S. Patent No. 6,704,352 by eliminating the elements and their functions of claims 1-20 of the U.S. Patent. It has been held that the omission an element and its function is an obvious expedient if the remaining elements perform the same function as before. *In re Karlson*, 136 USPQ 184 (CCPA). Also note *Ex parte Rainu*, 168 USPQ 375 (Bd.App.1969); omission of a reference element whose function is not needed would be obvious to one skilled in the art. For example; the claims 1-20 of the U.S. Pat. 6,704,352 fail to disclose a communication system of a plurality of mobile stations and base stations in the wireless network while the claims 21, 31, 41, 44 of the instant application recited. However; it would have been obvious to one having ordinary skill in the art at the time the invention was made to utilize the radio frequency (RF) receiver for communicating between the mobile stations and the base stations in the wireless network in order to improve the wireless communication system.
